### **DETAILED ACTION**

1. The Applicants' amendment and supplemental information disclosure statement filed on July 11, 2003 and May 14, 2003, respectively, were received. Claims 7-10 and 19-27 are amended.

2. The text of those sections of Title 35, U.S. code not included in this action can be found in a prior Office Action (Paper No. 7).

#### ***Claim Objection***

4. Objection of Claim 7-13 and 19-28 is maintained because the rejection is adequately set forth in paragraph 5 of Paper No. 7.

#### ***Claim Rejections - 35 USC § 102***

5. Rejection of Claims 7-13 and 19-28 under 35 USC 102(b) as being anticipated by Toyashima (US 4 954 586) or Gaylord (US 3 808 178) is maintained because the rejection is adequately set forth in paragraphs 7 and 8 of Paper No. 7.

#### ***Responsive to arguments regarding claim objection***

6. Applicants alleged that the instant claims had been amended to obviate the informality issue regarding the terms "alkyl", etc. However, the amendment was actually not done.

***Responsive to arguments regarding 35 USC § 102 rejection***

7. Applicant's arguments filed on July 11, 2003 have been fully considered but they are not persuasive.

*The Applicants' principal argument against the rejection is that a) "The compositions of the present invention have desirable characteristics without the need for a fluorine containing (meth)acrylate and a polysiloxane macromonomer having polymerizable groups bonded via one or two urethane bonds to the siloxane main chain as is described by Toyoshima." and b) ...the present invention are produced from siloxysiloxane monomers having aromatic-based substituents, rather than simple phenyl groups. ...The same is not described by Gaylord."*

Applicants' argument is not persuasive because of the following reasons:

With respect to a) Toyashima discloses a polymeric composition comprising tris(trimethylsiloxy)silylpropyl (meth)acrylate (i.e., reads on "one or more monomers" wherein z is 0, and R<sup>1</sup> is methyl, X is propylene and R is (meth)acryloxy) (col. 11, line 65-66) and components (A) to (D) (col. 3, line 14 to col. 4, line 35). Note that "comprising" recited in Claim 7 is an open-type transition phrase, which does not exclude the presence of other components. Therefore, the argument related to the use of a fluorine containing (meth)acrylate and a polysiloxane macromonomer having polymerizable groups bonded via one or two urethane bonds to the siloxane main chain in Toyashima's composition is irrelevant.

With respect to b), note that the present invention does claim the use of a siloxysilane monomer wherein R<sub>1</sub> can be a C<sub>6</sub> aryl (i.e., a phenyl) (see Specification, page 11, lines 11-12). Furthermore, Examiner cannot find a basis for the term "aromatic-based substituents" in the specification.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
